MAKE A BRUSH AND SCATTER IT

FIRST MAKE A BRUSH:

- I took a photo of a Christmas tree ornament – snow flake. Make this image black on a white background.
- Go to Edit and down to Define Brush preset and name your brush.
- That's it its now in your brushes.

WHEN YOU WANT TO SCATTER A BRUSH YOU HAVE TO DO THE FOLLOWING EVERYTIME:

Or you could do what I did and make a brush with your scattered images ☺

- Go to the brush set (this one) and select the brush you want to scatter
- * indicates what I do each time

There is a window at the bottom of the Panel that shows you the amended shapes when you amend the following.

1. Brush Tip Shape:
   - size – amend this as you want *
   - spacing – amend as you want *
   - click on dots around the circle icon to amend angle and roundness

2. Shape Dynamics:
   - size of jitter *
   - angle of jitter *
   - roundness of jitter *

3. Scattering:
   - tick both axes *
   - scatter *
   - counter – increases the number of snowflakes
